

Office of Children's Services
Empowering communities to serve youth

Overview of CANS for CSA Coordinators

New Coordinator Academy
Carol Wilson, Senior Program Consultant

Today's Topics

- Purpose of the Mandatory Uniform Assessment Instrument (MUAI)
- CANS Assessment
 - Communimetric, not psychometric tool
 - Rating scale and "Key Principles"
 - Domains, modules, versions
- Websites (how to help your local staff) and where to find information
- Reports and other info (data)
 - Making the CANS work for you

Your Role with CANS

Are you currently or do you plan to be certified on the administration of the CANS?

- Yes
- No

Your Role with CANS

- Are you (or will you be) designated as a CANVaS Local Administrator, sometimes referred to as a "DSU/RA" or a "CANS Super User?"
- Yes
- No

Why do we have the CANS?

All children and youth, regardless of eligibility criteria, age, or referral source, who receive services funded by the CSA state pool shall be assessed using a mandatory uniform assessment instrument approved by the State Executive Council.

Why do we do CANS?

- Statutory requirements for a mandatory uniform assessment instrument (MUAI) for children and youth served by the Children's Services Act (CSA)
 - COV §2.2-2648 (11)
 - COV §2.2-5210
 - COV §2.2-5212
 - Appropriations Act Item #282 B (8)
- State Executive Council
 - based on the recommendations of an interagency workgroup, selected the CANS for CSA for use beginning 7/1/2009
 - Adopted a comprehensive CANS policy (#3.6) effective January 1, 2019

CANS for CSA

- What did CSA need in the MUAI?
 - Utility in service planning, measurement of outcomes and level of need
 - Multi-agency/disciplinary approach, serving multiple populations
 - Mechanism for training and certifying raters who were not clinicians
 - Not used as a clinical mental health assessment for CSA
 - No cost to local government

Why do we do CANS?

- What is/are the purpose(s) of the CANS for CSA?
 - A. To create a foundation for service planning
 - B. To measure outcomes
 - C. To assist in determining a child's level of need

About the CANS

- CANS and related assessments were developed by John S. Lyons, Ph.D.
- Recommended as a functional assessment
- Adaptable because of “modular” design
- Intended to enhance communication with families and “shared vision”

Communimetric Tool

- CANS is a communimetric, not a psychometric, tool
 - Some subjectivity is inherent and expected
 - Balanced by consistent rating logic and specific item and anchor definitions
- Based on observations at a point in time
- About the “what” not the “why”
- Not about what’s easiest for the “system”...(e.g., rating a certain way to assure funding for a specific service)

Versions of CANS

Virginia Standard CANS

- Comprehensive Birth to Four
- Reassessment Birth to Four
- Comprehensive Ages 5-21
- Reassessment Ages 5-21

Virginia DSS- Enhanced CANS

- Comprehensive Birth to Four
- Reassessment Birth to Four
- Comprehensive Ages 5-21
- Reassessment Ages 5-21

Virginia CANS Domains

Life Functioning

Strengths/Resiliency

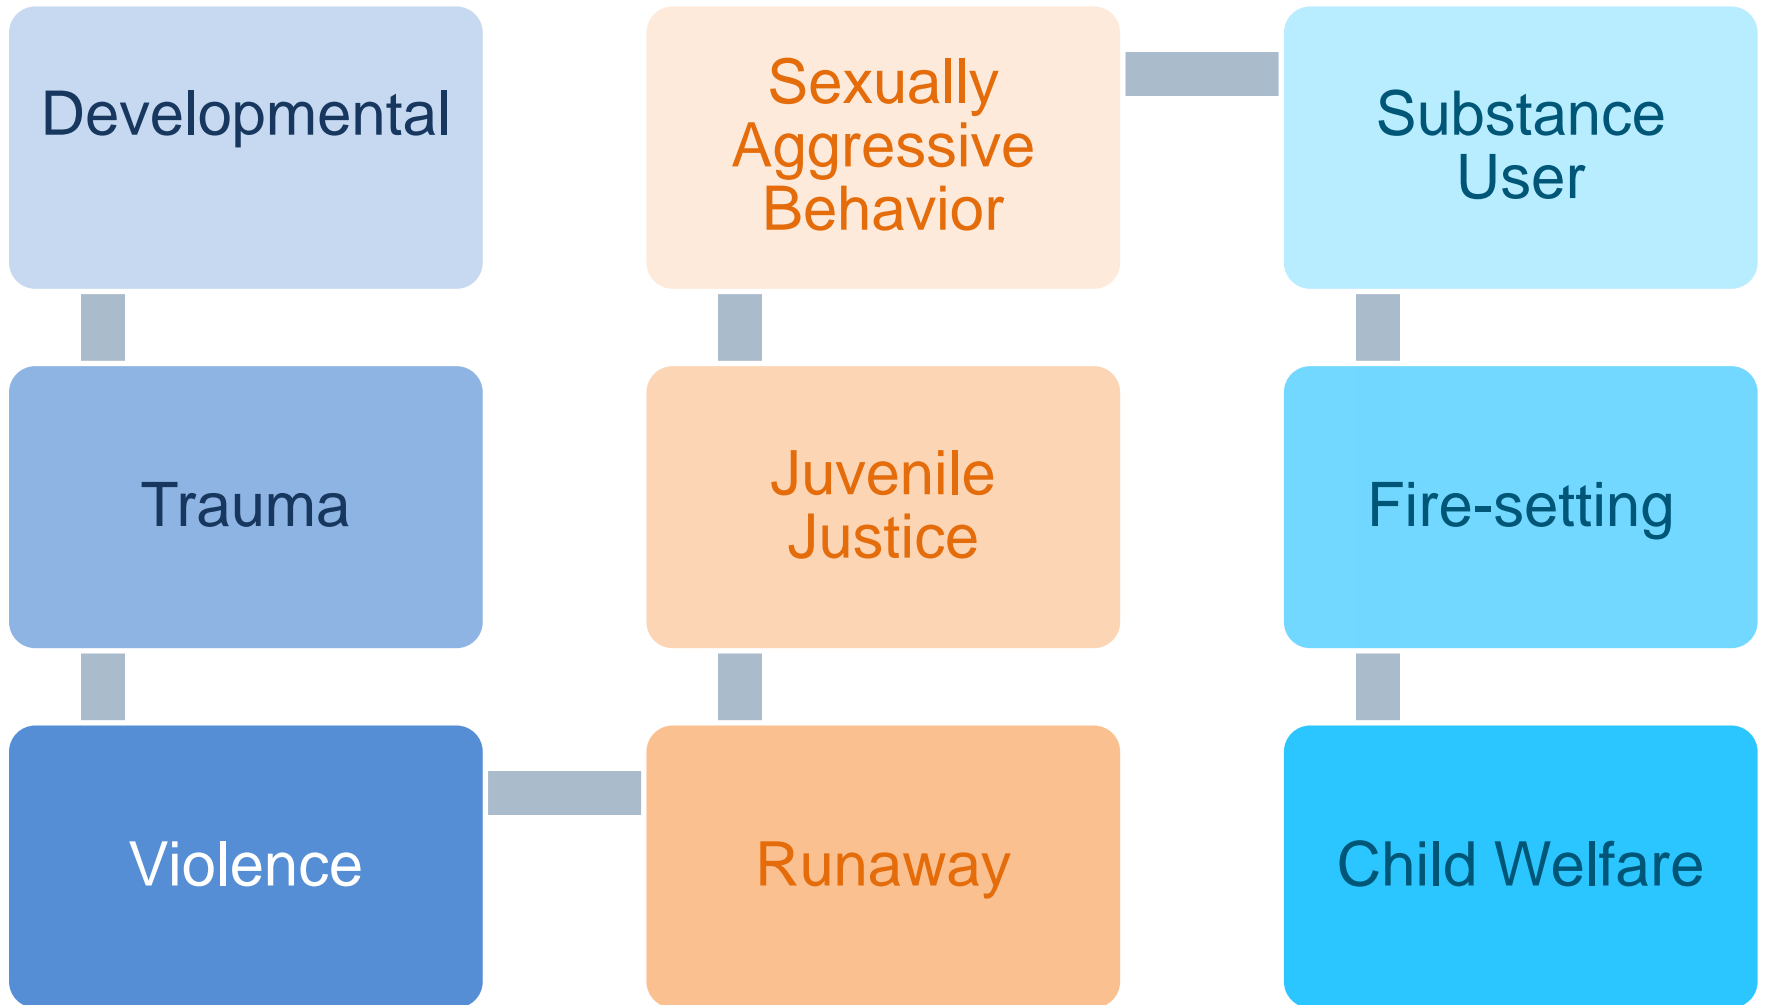

School

**Caregiver Strengths
and Needs**

**Behavioral/Emotional
Needs**

Risk Behaviors

Virginia CANS Modules

Rating Needs

- Ratings of "0" to "3"
- Needs items
 - "0" indicates no evidence of need
 - "1" mild level of need and/or history of need
 - "2" moderate level of need
 - "3" severe level of need
- Corresponding action levels of each rating on needs:
 - "0" no need for action
 - "1" monitoring, watchful waiting or prevention
 - "2" requires action to ensure that the identified need is addressed
 - "3" requires immediate or intensive action

Needs items rated "2" or "3" should be addressed on service plans.

Rating Strengths

- Strengths items
 - "0" indicates a centerpiece strength; may be important in service planning
 - "1" indicates a strength exists in this area; may require some development
 - "2" indicates strength has been identified, but no action taken to build or develop
 - "3" no strength identified in this area

*Strengths may be identified as areas to develop on a service plan or may be used to assist meeting a need or supporting healthy functioning.

Rating the CANS

- The lower the rating on both strengths and needs items, the better the child is functioning.
- Lowering of numbers indicates improvement in functioning.

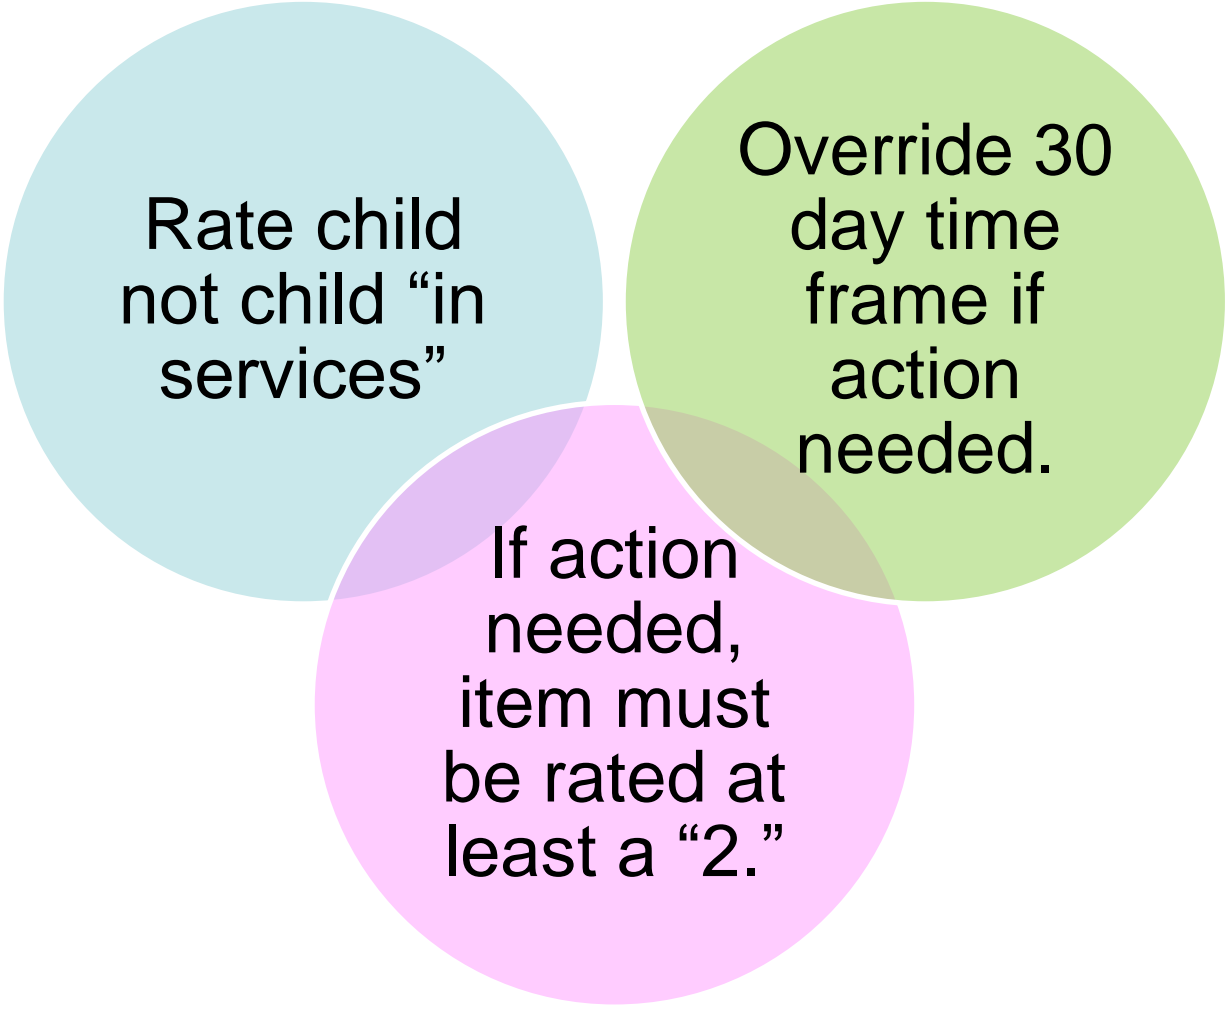

Rating the Caregiver

- Who is the Caregiver?
 - Agencies or case managers are never the caregiver
 - Rate caregivers
 - With whom the child or youth is living
 - From whom the child has been removed and the plan is to reunite
 - Relatives or others who are potential placement resources
 - Foster parents are rated only if the child is in a pre-adoptive placement
 - Older youth for whom there is no planned permanent caregiver
- Rate the Caregiver assessment on how each item (need or strength) *affects that person's ability to care for the child, not how it affects the caregiver.*

Three of Six Key Principles

A diagram consisting of three overlapping circles. The top-left circle is light blue, the top-right circle is light green, and the bottom-center circle is light pink. Each circle contains a key principle. The circles overlap in the center, creating a purple/pinkish hue.

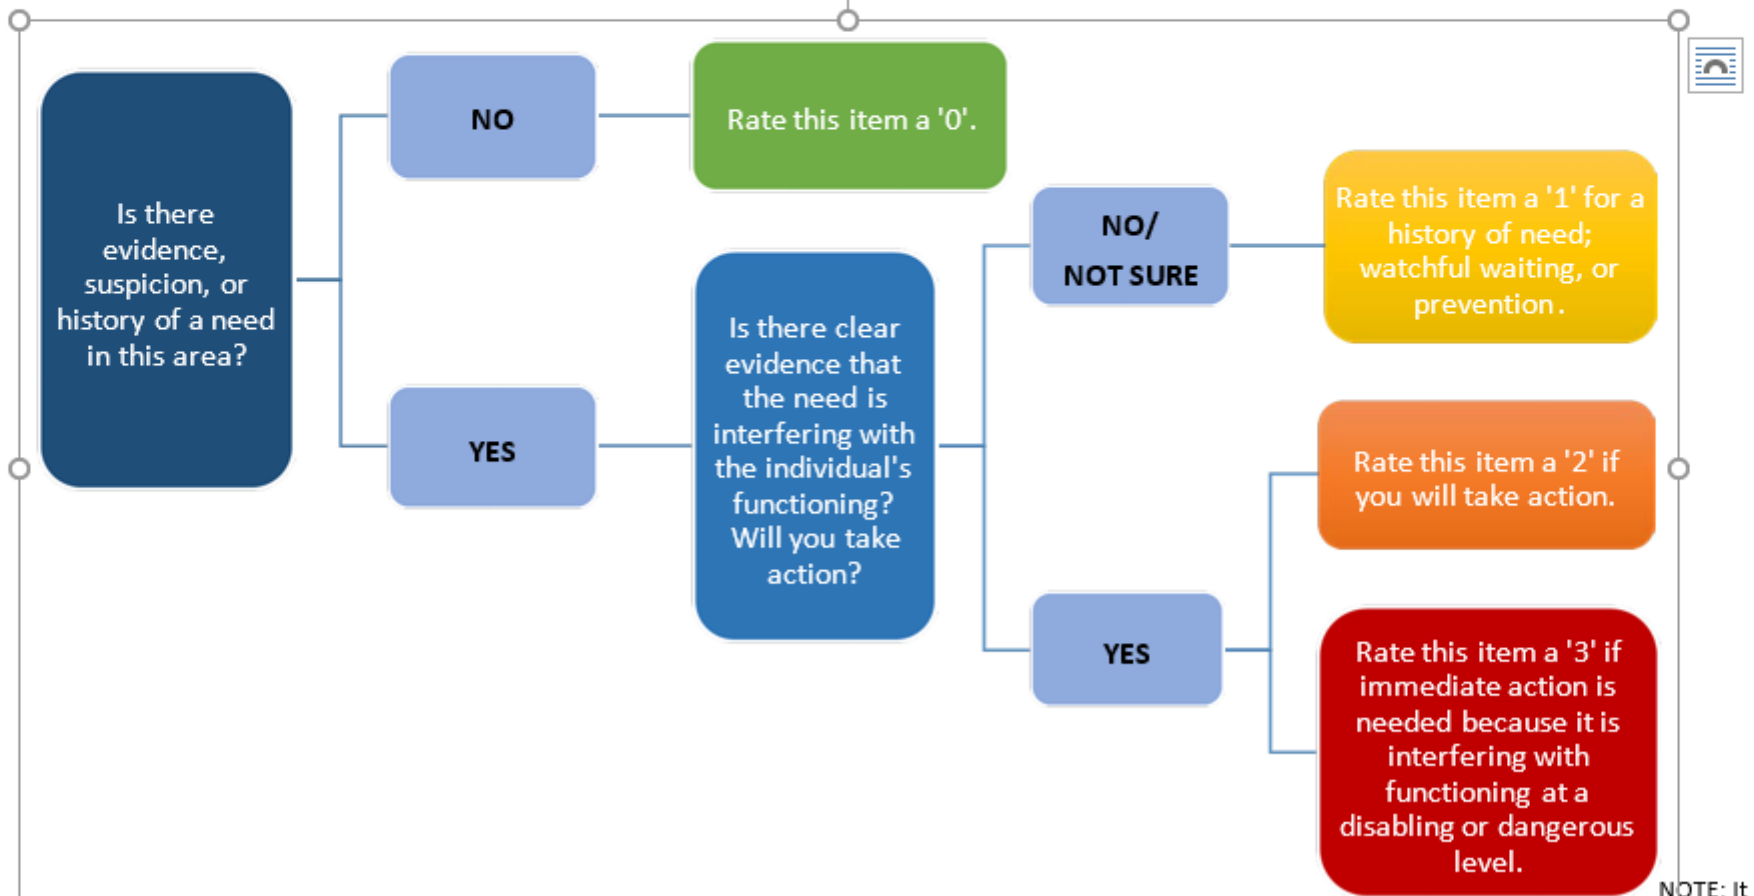

Rate child
not child “in
services”

Override 30
day time
frame if
action
needed.

If action
needed,
item must
be rated at
least a “2.”

ASSESSING FOR NEEDS

Decision of whether or not information represents a NEED

Font Paragraph Styles

ASSESSING FOR STRENGTHS

Decision of whether or not information represents a STRENGTH |

How often is the assessment done?

- Minimum state CSA requirements are:
 - Initial (Comprehensive)
 - Annual (may be Reassessment or Comprehensive)
 - Discharge (Comprehensive)
- Reassessments done during the year as needed for service planning or other funding sources (e.g., Medicaid)
- SEC Policy 3.6 (CANS Policy) provides Frequency of Administration requirements

Rating the CANS

Over time, a drop in ratings on strengths and needs items means a child or caregiver's functioning is improving.

- True
- False

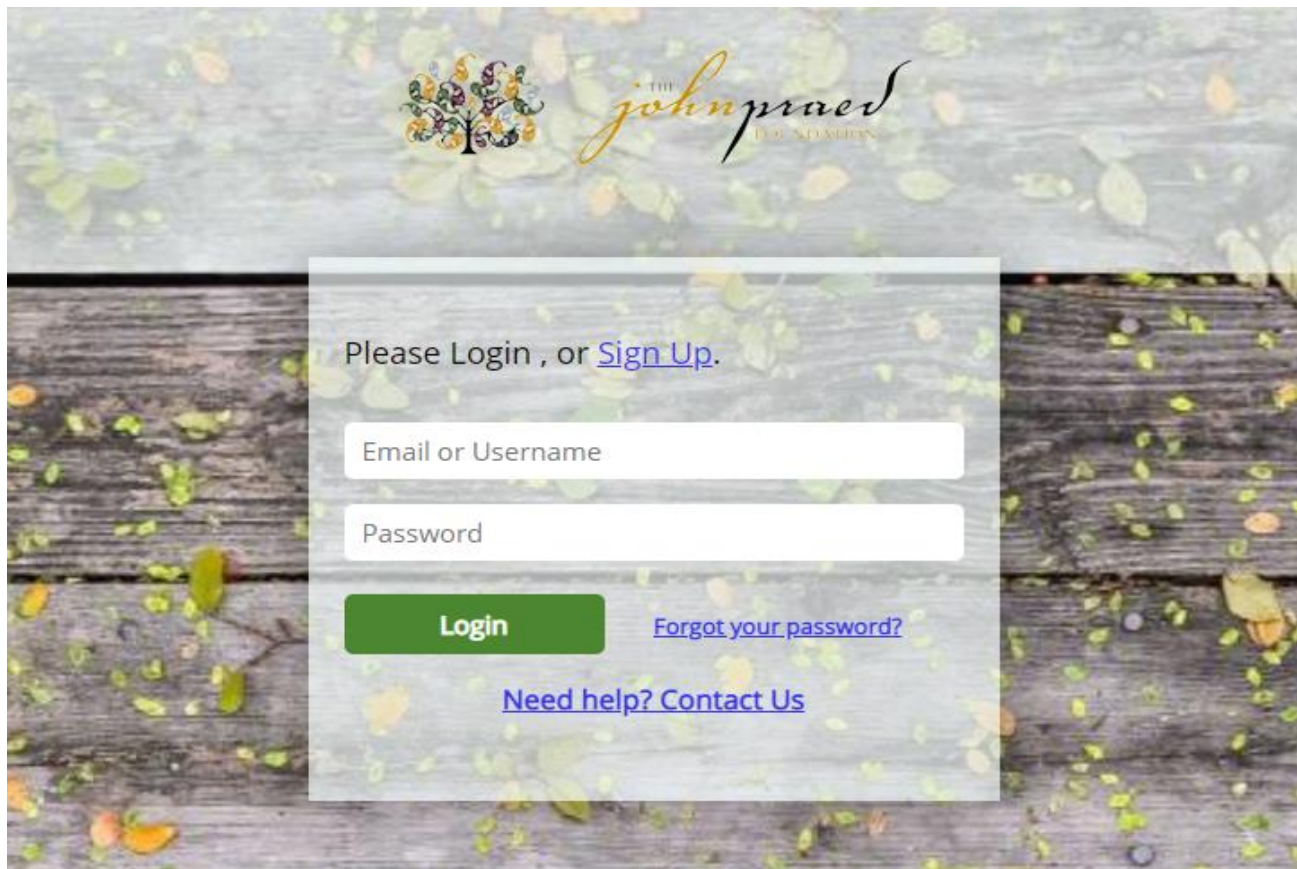

CANS Websites

Two websites you should know

- CANS Training and Certification Site hosted by the Praed Foundation on SchooX software at www.tcomtraining.com
or
<https://www.schoox.com/academy/CANSAcademy/home/>
- CANVaS 2.0 –Online assessment system to complete CANS assessments and gather data hosted on VITA servers and supported by RCR Technology, Inc.
<https://csa.canvas.virginia.gov>

CANS Training/Certification Site

CANS Training and Certification Site

- Case managers
 - Create online accounts
 - Go through training modules and review supplemental materials
 - Take a practice exam
 - Take a certification exam
- Certification is granted with a passing score of .70 or higher.
- Case managers should print a copy of the certificate.

CANS Certification

- The CANS is administered by the local public agency case manager for the child and family.
- Anyone administering the CANS must be currently certified on its use.
- Recertification is required annually.

Introduction to Training

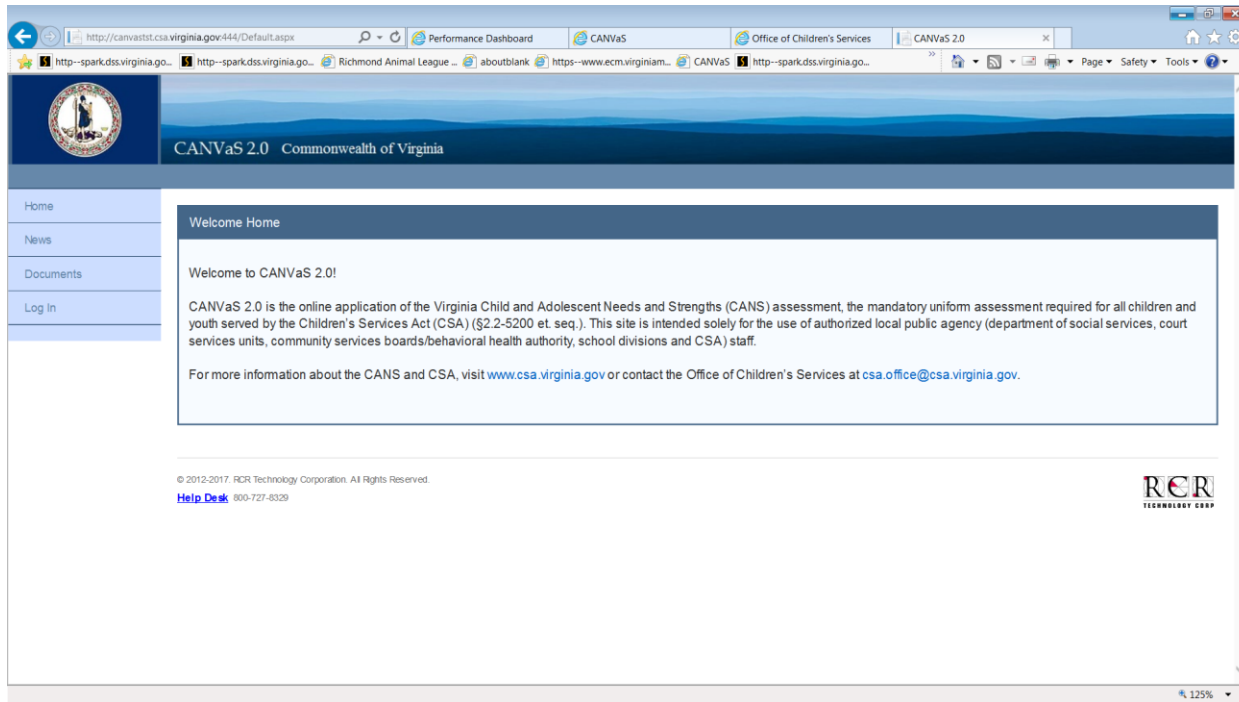

Step

Accessing the Training and Certification Site

- The link to detailed instructions on how to access the CANS training and certification site is found in the CANS folder on the OCS website (www.csa.virginia.gov)
 - Go to “Resources” > CANS>Training and Certification
- http://www.csa.virginia.gov/Content/doc/REVISION_02052019_New_User_Instructions_to_Access_CANS_SchoolX_Training_and_Certification_Site.pdf

Certification Data Transfers to CANVaS 2.0

CANVaS 2.0

Accessing CANVaS 2.0

- Case Manager
 - May create child profiles
 - Completes online assessments
 - May view and print assessments
 - May view and print the Individual Progress Report and the Permanency Report for child and caregivers for whom that case manager has entered at least one assessment

Accessing and Navigating CANVaS 2.0

- Instructions for accessing and navigating CANVaS for Case Managers may be found on the OCS website following the same path as above but clicking on “Navigating CANVaS 2.0-Basics for Case Managers/Raters” found at
- http://www.csa.virginia.gov/Content/doc/Navigating_CANVaS_2_0_Basics_for_Raters_Case_Managers.pdf

What Case Managers Need

- If you are the Local Administrator
 - Provide both the Instructions for “Access to the CANS Training Site” and the “Navigating CANVaS Basics for Case Managers” when an account is requested
 - Make them aware of how to access site support for both websites
 - “Click on “Contact Us” or **green** button for “**Help**” in lower right hand corner of training/certification site
 - Contact CANVaS Help Desk at 1-877-727-8329 or canvas@rcrtechnology.com

More CANS! Local DSS Foster Care Prevention Model

- LDSS "in-home" model for foster care prevention cases
 - Focus on serving children and families where they are
 - Formerly considered CPS Ongoing and Foster Care Prevention
 - Requires Prevention Plans and CANS done every 90 days

DSS Foster Care Prevention Model

- LDSS uses CANVaS to enter CANS for in-home cases that are not "CSA"
- Raters select type of case for each assessment entered into CANVaS
 - Another reason it's very important that correct Referral Source is chosen

CANS Reports and Data

Making the CANS Work for You

How is CANS data used?

- Performance measures in OCS data
- CANVaS Reports Manual
 - Administrative Reports (e.g., Staff Certification, Active Users)
- Individual Progress and Permanency Reports
- Longevity Reports (e.g., Key Intervention Needs over Time, Individual Collaborative Report)

Individual Progress Report-William P.

- Compares a child's initial ratings to the two most recent assessments
- A rater may view the report if he or she has entered at least one assessment for the child
- Can cut and paste into Excel to create simple graphs
- Report provides list of "resolved" issues (when a "2" or "3" becomes a "0" or "1".
- Notes items requiring continued intervention
 - Most recent rating of "3"
 - Most recent rating of "2"

This report will enable the user to review the individual child's assessments across time.

Multi-Level Collaborative Formulation (Over Time) Report

This report provides a comparison of frequently occurring actionable treatment needs over time for a particular cohort of children. The cohort is defined based on the date of their initial assessment (input the date +range into the Initial Start and Initial End date input boxes). The comparison reassessment(s) can be chosen using the "Reassessment" drop-down menu. Presented are the six most frequently endorsed treatment needs at entry into the Behavioral/Emotional Need or Risk Behavior Domains (items in blue for Behavioral/Emotional needs; the item in red for Risk Behaviors), and the four most frequently endorsed treatment needs from the Life Domain Functioning domain (items in grey). For each item, the first bar represents percentage of children with an actionable need at the first assessment point, and the second bar represents the percentage of children with an actionable need at the chosen reassessment time point. The locality filters are primary and based on the Users CANVaS 2.0 access permissions. This report is available according to User's permissions.

Key Intervention Needs Over Time

Individual Collaborative Report (Longevity Reports)

- Similar to the IPR except report has a number of filters such as:
 - Date range
 - Type of assessment
 - Can compare Initial to any assessment
 - Include or exclude discharge CANS

That's enough for now!!!
